Template for Project Documentation

Each group must provide documentation that includes:

1) Introduction

This guide is meant to help them produce good project documentation.

2) Purpose and Method

The purpose of the project, it gives in-depth work on a substantial problem to show individual creativity and to apply where appropriate knowledge, skills, and techniques taught throughout the program.

3) Teamwork and Project Management

Each team is made up of a number of students working on one project. Teamwork is required since teamwork is an integral part of the project.
All team members are expected to participate in all project activities and none of these activities are to be performed exclusively by a student.

Report Format

A report is submitted by the whole team and will be graded as a whole, and points will be split among the team members:

1) A report must have a cover page containing:
- The course title.
- The group number.
- The project title.
- The submission date.
- All team-member names.

Negative points will be assigned to reports missing- or having an incomplete cover page.

2) The first part of the report must include an introduction and the purpose of the project.

3) The second part of the report includes the ER diagram of project.

4) The third part of the report includes the Relational model of the project.

5) The fourth part of the report includes the SQL statement that are used to create the tables of the project's database. Also, you must write SQL queries for all types of commands and clauses in the lecture.

Note: Every table must include at least 20 records.

    Team members of project from 3 to 5 students.

    Database project of 5 students should include at least 15 different tables linked together.
